A new undergraduate degree course that offers a multidisciplinary training in the social sciences, from both a quantitative and a qualitative perspective.

The course provides students with **multidisciplinary preparation** which enables them to analyse the different facets of economic, political and social reality, both **nationally and internationally**.

Students will acquire the **quantitative skills** necessary for empirical analysis in the social sciences, and the **interpretative tools** to ask relevant questions and understand complex environments.

The course combines core teaching in **economics** and **political sciences** with training activities in **statistics, management** and **law**.

We expect students to find jobs in public administrations and private companies as specialists in management, economic and political sciences.

Graduates will also be able to gain access to any master's degree in economics, political science, management, law and statistics of their choice.

LAW	Principles of Public Law	Principles of Private Law	European and International Law		
MATH AND ECONOMICS		Mathematics for Social Sciences	Microeconomics	Macroeconomics	
POLITICAL SCIENCE, SOCIOLOGY AND SOCIAL RESEARCH		International History of Globalization	Sociology & Social Research	Political Behavior and Institutions	Political Economy
MANAGEMENT	Principles of Management	Accounting & Financial Statements			
STATISTICS, PROGRAMMING AND BIG DATA IN SOCIAL SCIENCES		Econometrics	Programming Lab	Statistics & Programming	Big Data in Social Sciences
SECOND LANGUAGE	French or Spanish
